

# CloudLogix Wins TeXchange's "One to Watch" Award

**CloudLogix, foremost provider of cloud-based Synchronized Resource Planning (SRP) solutions, announced today that it has won TeXchange's inaugural "One to Watch" award. The award celebrates small member companies of TeXchange that have less than \$2 million in revenue, but that have big potential.**

“ We are thrilled to have been selected by TeXchange and this award recognizes the company's success to date, and reinforces the innovative direction we have set for the future. ”

Grapevine, Texas (PRWEB) October 03, 2012

CloudLogix, foremost provider of cloud-based Synchronized Resource Planning (SRP) solutions, announced today that it has won TeXchange's inaugural "One to Watch" award. The award celebrates small member companies of TeXchange that have less than \$2 million in revenue, but that have big potential.

CloudLogix received the award on August 14th at an event unveiling the Fast Tech list of the 35 fastest-growing technology firms in the Dallas-Fort Worth area. TeXchange was created to promote entrepreneurial startup companies and investors in the technology and life sciences field, through open table discussions, networking, and educational forums. The group presently has over 300 members.

Rob Langhorne, CloudLogix's CEO, who received the award said "We are thrilled to have been selected by TeXchange and this award recognizes the company's success to date, and reinforces the innovative direction we have set for the future. It reflects also the dedication by every employee who has helped make CloudLogix a success. Huge congratulations to the entire CloudLogix family."

Langhorne went on to explain that the typical Supply Chain software solutions are often too bulky, expensive and may not integrate with other in-house systems, such as warehouse, accounting, supply chain management and sales management. CloudLogix's products, on the

other hand, can synchronize with existing systems and make sure everyone is communicating together.

CloudLogix builds tools that enable software companies, IT departments or supply chain organizations to incorporate Software-as-a-Service and advanced analytics into their products. When companies need the basic products, CloudLogix has products that use the tools to build modern, active supply chains.

#### About CloudLogix

Since its beginnings CloudLogix has grown to be a provider of Business Intelligence/Analytics tools and Supply Chain Management applications delivered as Software-as-a-Service. The tools work together to complete an informational loop in logistics processes; cycling validated logistics data to the intelligence/analytics tools and returning business decision data to the supply chain for execution by the suppliers and service providers.

The power of the company comes through its patent-pending toolset's ability to integrate to existing enterprise IT infrastructure and allow the system to efficiently adapt to the constant changes in the demand/supply chain. CloudLogix provides solutions for thousands of users in 14 countries, and every month, the company is gro
